

Alio: Automating School Financial Management

Alio is the next generation in software designed specifically for financial management and human resources in school administration. Weidenhammer Systems Corporation (Weidenhammer) has enhanced its SAGE Millennium software, and is rolling out its upgraded product under the name Alio (pronounced AH-lee-oh).

“Essentially, we’ve re-engineered an already robust system

Sophisticated solutions. Intuitive results.

Built on information ingenuity, Alio delivers the latest technology in a user-friendly format. For managing finance, payroll and human resources, here's a glimpse of what you can expect.

- Financial Accounting System
- General Ledger
- Purchase Orders
- Accounts Payable
- Accounts Receivable
- Revenue & Expenditure
- Fixed Asset
- Reporting
- Warehouse
- Human Resource
- Payroll
- Position Control
- Salary Administration
- Application Tracking
- Personnel Administrator
- Leave Administration
- Employee Portal

and manage their school's finances while ensuring that even the most demanding payroll and human resources needs are met. Information is electronically transferred to the general ledger, minimizing data entry requirements and human error.

Current SAGE users will continue to benefit from automated district financial, payroll and personnel functions. As their needs change or administrative demands grow, Alio is a natural progression for integrated solutions.

John Weidenhammer is the CEO of Weidenhammer, an information technology firm located in Wyomissing, PA.

to one that is even more intuitive and in more perfect alignment with school procedures and state requirements,” said John Weidenhammer, CEO, Weidenhammer. “Alio is an affordable and easy-to-use solution for administrators who need instant access to information or to produce reports quickly.”

Designed for efficiency and ease of use, the software was developed by a team of accountants, auditors, and technical design experts and a company that has innovated the education industry since 1978. Built on Oracle™ Technology, Alio runs on Windows, Linux and Unix, and the full functionality can be accessed via Internet or client server access.

Like SAGE, Alio is designed with accounting procedures and auditing controls that enable administrators to easily budget, monitor

Advancing School Administration

A comprehensive suite of software applications, Alio efficiently automates the financial management, payroll and human resource processes of entire school districts. Because Weidenhammer specializes in state-reporting requirements, getting school districts up and running quickly is seamless—regardless of their size or location.

“Alio is an affordable and easy-to-use solution for administrators who need instant access to information or to produce reports quickly.”

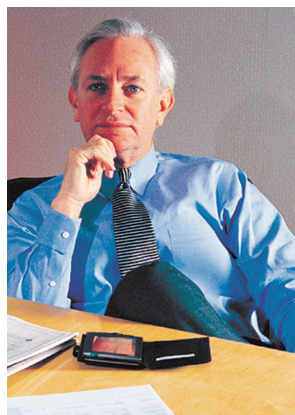

— John Weidenhammer, CEO
Weidenhammer Systems Corporation

Backed by close to three decades of experience in the K–12 market, Weidenhammer serves nearly 1,000 school districts in 20 states. They range in size from single-site schools with fewer than 500 enrolled students to sites with more than 100 buildings and 70,000+ students.

Supporting Efficient Systems

With nearly 200 IT professionals in seven locations and a network of strategic partners – like Microsoft™ and Oracle to name a few – Weidenhammer is equipped to provide complete software, installation, training, and support.

To bring education professionals across the nation the most advanced IT solutions – and keep the process simple – Weidenhammer offers workshops and seminars by certified trainers.

Whether schools want to take the next step with Alio, or get more mileage from their current system, Weidenhammer makes Finance, Payroll and Human Resource Management work smarter.
